

A SPACE FOR GATHERING

*Assignment: Analyze a site in Downtown Champaign,
design a building fit for the space and community needs.
December 2022*

Downtown Champaign, the project site, hosts a built environment that supports a diverse and ever changing community. Through my design I hoped to enhance that role by fostering growth within the community - both literal and intellectual. The result was a museum-like space with a primary dedication to recreation and community engagement.
