

SOLANAVITAS

Assignment: create a 10' x 10' room designed for prospect and refuge, a corresponding sculpture park, and a visitors center. May 2022

This project, titled Solanavitas—a fusion of Latin words meaning 'promptness of the sun' was driven by a deep focus on the sun's influence in nature. Many find both prospect and refuge in natural environments, experiencing the sun's role in shaping the world around them. Every element of the design embodies this connection—whether by representing the sun directly, mimicking its patterns, or reflecting its impact on the natural landscape.
