

# HANSEN FAMILY CABIN

*Request from my Father: Generate concepts for a  
family cabin.*

*December 2022*

When my father shared his dream of building a family cabin, I saw an opportunity to hone my architectural skills. I took the initiative to consult with him, translating his desires into concept drafts exploring initial ideas of space designation and form.

Some of his requests included:

- Two first floor beds and baths
- Loft with bunking rooms
- Lower patio, and upper balcony connected to the loft
- A drive through garage big enough for a boat
