

# LONGBOARD: EXPLODED VIEW

*Assignment: Pick a product with multiple components, disassemble and analyze, photograph an exploded view.*

*February 2023*

For this project I wanted to assess something personal. Pictured is my longboard of ten years; this board has seen me through travels, friendships, and a few broken bones. Because of this I wanted to analyze it's forms and view it's inner workings. I appreciated the familiarity of the parts, but also the repetition and symmetry of components on all four sides.
